NAVIGATION LIGHTS 12m

“Junior N12” Lights B*

The JUNIOR Navigation Lights are also designed for vessels up to 12 metres. They are very easy to mount and their small size makes them very discreet but without compromising their effectiveness. The JUNIOR range covers all types of the required navigation lights. **Material:** Nylon fibre mix housing. Shatterproof plexiglas (PMMA) lens. **Contacts:** Brass. **Seal:** Nitrile water resistant. **Bulb:** 12V / 5W. **Luminous intensity:** 5cd. **Minimum visibility distance:** 2 nautical miles. JUNIOR navigation lights are available in white, black or chrome.

Emergency Navigation Lights

Emergency navigation lights are ideal for use on small crafts and inflatable boats etc. or as emergency lighting in larger vessels. They are waterproof and complete with brackets that are fastened on the boat. They can be used when conventional lights are not suitable for the vessel or when they are not operating. Emergency navigation lights are available with external light reflectors and use standard alkaline batteries (D cell), giving approx. 9 hours continuous use.

"Junior N12 & S12" Lights

The all round pedestal lights are designed for sailboats under 12 metres. These lights are much smaller in size and with an improved design to fit your requirements both functional and aesthetic. The pedestal allows a firm attachment to the boat. Durability and longevity are ensured through the high quality construction standards of LALIZAS.

- Material: Nylon fibre mix housing. Shatterproof polycarbonate lens
- Contacts: Brass.
- Seal: Nitrile water resistant.
- Bulb: 12V / 5W.
- Luminous intensity: 5cd
- Minimum visibility distance: 2 nautical miles.

"Economy" Lights

The white signal light "Economy" belongs to the homonymous group of signal lights. It combines perfectly the economic price and a good standard of technical characteristics. The lower part of the light is black and made from polypropylene with UV protection. The lens is in white colour and it is made from the same material as the lower casing. The light is mounted on the boat with three screws, while the wires are connected to the main circuit by opening a hole underneath.

Boat Cleaning Set

The LALIZAS cleaning set consists of one wash brush (50904), one scrub brush (50905), one hook and one telescopic handle. The boat brushes are used for gentle or hard cleaning respectively. They are made of polypropylene body, and PVC bristles to resist better against the salt and the sun. The nylon hook is light, with small length and large angle for easier and better hooking. The brushes and hooks by LALIZAS are constructed with thread in order to be fitted to the handle. The telescopic handle is 110cm long, and can extend up to 200cm, so that you can adjust it accordingly. It is made of anodised aluminium for more durability and longevity. The LALIZAS cleaning products are constructed for your convenience according to your needs.

ADVISOR

This category includes all navigation lights that are constructed especially for use on boats up to 20 metres long, and they are bigger than the ones for boats up to 12 metres. The various groups of this category include all round lights or stern, side, and masthead lights.

Use: As in the 12 metres category, sailing boats must use stern and sidelights when they have the sails open, and when they are motor driven, they must use the masthead light too. Instead of using separate sidelights, sailboats can combine them into one bicolour light.

Instructions of Use: The navigation lights in this category can be mounted either vertically or horizontally (tricolour) in relation to the deck, and they are connected to the central and auxiliary circuit. They are mounted on the surfaces with screws, while the case is clipped on the base. Navigation lights should not be put under any kind of strain. All lights should be positioned in such a place so as to conform to the regulations.

Maintenance: Regular and proper maintenance is essential if you want your navigation lights to operate properly and for a long time. Therefore Lalizas suggests that on regular basis you:

- Spray the lights with a silicone spray to protect the casing
- Check the nitrile water resistant seal, and if necessary replace it
- Clean the contacts and spray them with a product that is only for electrical contacts
- Check the bulb and if necessary replace it.

Replacement: All navigation lights must be replaced when the lenses change colour, or you notice crack on the casing, or the crystal.

Tri Colour & Anchor light

The tri-colour and white navigation light features an improved bulb holder, simplified wiring installation and compact two piece design.

Code.....A* 110045 57,16 €

1. Manufactured from a special compound of ABS and Polycarbonate.
2. Non magnetic stainless steel electric contacts.
3. One compact product (only 2 pcs.).
4. Higher light distribution.
5. Easier and more effective electric connection.
6. Improved (stable) lamp holders.
7. Protection against electrolysis.

To change the bulb follow the instructions as indicated in the pictures.

Unscrew the casing by turning it anticlockwise. Pull the casing, and change the bulbs needed. Place the casing by matching the fasteners to the relevant slots and turning clockwise.

"Eye" Lights

Designed for powerboats under 12 metres long, the "EYE" lights are a completely different design in the LALIZAS range of vertical mount navigation lights. Their special design enables them to perfectly be integrated on the vessel, thus ensuring safety without compromising aesthetically. They are fitted into the vessel's bow, thus not leaving any sharp edges to catch lines or cause injuries. **Material:** Nylon fibre mix housing. Shatterproof plexiglas (PMMA) lens **Contacts:** Brass. **Seal:** Nitrile water resistant. **Bulb:** 12V / 5W. **Luminous intensity:** 5cd **Minimum visibility distance:** 2 nautical miles. EYE navigation lights are available in white, black or chrome.

"Pop-up" Bicolour Lights

The "Pop-up" is the ultimate in ergonomic design and is ideal for those that want to make a difference. It has been designed to be retracted by pressing its top when not in use and to be re-activated by pressing the top again. The design allows freedom of movement around the deck without the fear of tripping on the light. It is equipped with a built-in switch that activates the light only when in the up position and deactivates when retracted and is therefore ideal for installation on the bow. The "Pop-up" navigation light is easy to fit, supplied pre-wired and has a waterproof deck seal. The housing material is Nylon (31085, 31095) and ABS (31105) with a Plexiglas (PMMA) lens. All materials are UV resistant. The light uses a 12V/5W bulb providing 5 candelas of light with a minimum visibility 2 nautical miles. All electrical contacts are Inox. Available in white, black, and chrome.
