SEA ANCHORS - DROGUES

Use

Sea anchor, also called drogue, is part of a boat's necessary safety equipment. It is used to slow down your boat or life raft when you are found in strong winds or heavy seas. More over it will stop your boat and turn it so as to face into or away from the waves. Further from the safety reasons, a sea anchor can be used as means to keep your boat as stationary as possible and not be pushed by the wind, thus very useful when you are fishing, swimming, or in waters too deep to anchor.

Instructions of use

Made from strong-coated PVC, the drogue is open at both ends and includes lines that create two loops at the front, and one loop at the end. The sea anchor (drogue) is tied to the boat's bow (B) with the use of a rope, which must be of at least five (5) times the boat's length (A). Tied to the bow of the boat, the rope is passed through the two loops of the drogue's front lines, creating a tight knot (C). The larger the size of your drogue (larger opening), the bigger its effectiveness will be.

In order to pull the drogue out, you should tie a second rope at the end loop of the drogue (D), and pull the drogue out when there is no more need.

To prevent other boats from running over the ropes of your drogue, you may use a floating buoy (E) that will be tied to the rope used for pulling the drogue out of the water. Drogues are not used for permanent anchorage.

Professional Sea Anchors - Drogues ab 48,98 € A*

LALIZAS has designed the Professional Sea Anchor (Drogue) especially for use on large boats and under harsh conditions. The fabric is polyester 200D coated on both sides with 0,45mm PVC. Lalizas Professional Sea Anchors are immensely strong using 40mm, UV resistant, webbing terminating on a 6mm x 60mm INOX connecting ring. LALIZAS drogues are supplied in a safety yellow colour, packaged in a handy, tough stowage bag.

ATTENTION: This is a very general guide and there may be variations based on the weight, keel of the boat, on even the intended use of the sea anchor etc. Your choice should not be based only on the guide.
