

INOX (Niro) Verdecke

USEFUL HINTS

CANOPIES

LALIZAS canopies are manufactured using only materials that are both weather and UV resistant. However, for good maintenance, do not allow contact with flames or sharp surfaces. LALIZAS recommends washing your canopy and straps with clean water. Allow to dry completely before storing or covering. Also remember to fold and cover the canopy with its top, when not in use.

INOX Frame for "Athens" Canopy

The "Athens" range has been specially designed to satisfy your needs to the smallest detail. This model is supplied as a ready to fit frame, without the canopy top, which can be purchased separately. The frame is made from INOX for extended life and high resistance to corrosion, while also providing an attractive, polished finish. It is available in various sizes with length 180 to 280 cm, width 150 to 350cm, while the height is adjustable, up to a maximum of 155cm. The canopy tops are made from PVC coated Nylon fabric, which is 100% waterproof, and resistant to UV rays. The tops are available in four colours, navy, forest green, white, and burgundy.
Choose the frame that mostly fits your boat by following the instructions on page 113. Then choose the colour of the canopy top you prefer and you will have the combination desired, for relaxing days at sea.
